Stop the Spread!

The Urbana Park District Needs Your Help Removing Invasive Mugwort

Mugwort (*Artemisia vulgaris*)

Identification:

- Grows to 2-6 feet tall
- Alternate leaves with a dark green top and silvery underside
- Leaves have pointed lobes and toothed edges
- Purple stem with grooves

For non-chemical control, hand pulling throughout the growing season or covering the infested area with black plastic is recommended.

It spreads by an underground rhizome or stem that must be starved of energy to remove without chemical.
